Publication schedule v

OPTICAL THIN FILMS

Optically active films and ion processing of optical materials

Properties of transparent conducting oxides deposited at room temperature 1
L. Davis (Fort Lauderdale, FL, USA)

Optical switching technology for glazings 6
C. M. Lampert (Berkeley, CA, USA)

Low temperature preparation of transparent conducting ZnO:Al thin films by chemical beam deposition 14
H. Sato, T. Minami, S. Takata, T. Miyata and M. Ishii (Ishikawa, Japan)

SnO_2 transparent conductor films produced by filtered vacuum arc deposition 20
A. Ben-Shalom, L. Kaplan, R. L. Boxman, S. Goldsmith and M. Nathan (Tel-Aviv, Israel)

Transparent conducting *p*-type NiO thin films prepared by magnetron sputtering 27
H. Sato, T. Minami, S. Takata and T. Yamada (Ishikawa, Japan)

Characterization of n-CdS/p-$CuGa_x In_{1-x} Se_2$ thin film heterojunctions 32
Y. Aparna, P. S. Reddy, B. Srinivasulu Naidu and P. Jayarama Reddy (Tirupati, India)

CVD, PECVD and non-vacuum deposition techniques for optical coating

Low temperature preparation of $SrTiO_3$ thin films 37
E. Dayalan and M. S. Tomar (Tulsa, OK, USA)

Thermal stability of pyrolytic tin oxide films on aluminium 40
A. Roos (Uppsala, Sweden), G. Chinyama (Lusaka, Zambia) and P. Hedenqvist (Uppsala, Sweden)

Optical properties and equilibrium temperatures of titanium-nitride- and graphite-coated Langmuir probes for space application 46
M. Veszelei and E. Veszelei (Uppsala, Sweden)

Deposition and characterization of multicomponent oxide films and multilayers from aqueous solution 51
G. J. Exarhos and N. J. Hess (Richland, WA, USA)

Silicon based, protective transparent multilayer coatings deposited at high rate on optical polymers by dual-mode MW/r.f. PECVD 58
J. C. Rostaing, F. Coeuret (Jouy-en-Josas, France), B. Drevillon, R. Etemadi, C. Godet, J. Huc, J. Y. Parey and V. A. Yakovlev (Palaiseau, France)

Inhomogeneous dielectrics grown by plasma-enhanced chemical vapor deposition 64
S. Lim, J. H. Ryu, J. F. Wager (Corvallis, OR, USA) and L. M. Casas (Ft. Monmouth, NJ, USA)

Characterization of magnetron-sputtered diamond-like thin films for optical coatings in IR 67
G. A. Clarke and R. R. Parsons (Vancouver, B.C., Canada)

DIAMOND AND RELATED MATERIALS

Electronic and optical applications of diamond and related materials

Thermal reaction of Ta thin films with polycrystalline diamond 72
J. S. Chen, E. Kolawa, M.-A. Nicolet and F. S. Pool (Pasadena, CA, USA)

Effect of oxygen on hydrogenated amorphous carbon films 77
Y. Suefuji, Y. Nakamura, Y. Watanabe, S. Hirayama and K. Tamaki (Kanagawa, Japan)

Fabrication of amorphous diamond films 82
S. Falabella, D. B. Boercker and D. M. Sanders (Livermore, CA, USA)

Elsevier Sequoia

Synthesis of diamond and related materials

Selective area deposition of diamond on 4 in Si wafers 87
W. Hänni, C. Müller, M. Binggeli, H. E. Hintermann, P. Krebs and A. Grisel (Neuchâtel, Switzerland)

Plasma diagnostics of a d.c. arcjet chemical vapor deposition diamond reactor 91
S. W. Reeve and W. A. Weimer (China Lake, CA, USA)

Diamond and related materials (Poster session)

Properties of mixed-phase BN films deposited by r.f. PACVD 96
D. C. Cameron, M. Z. Karim and M. S. J. Hashmi (Dublin, Ireland)

Thermal expansion of chemical vapor deposition grown diamond films 103
S. B. Qadri, C. Kim, E. F. Skelton, T. Hahn and J. E. Butler (Washington, DC, USA)

Diamond thin films synthesized by a multinozzle oxy-acetylene chemical vapour deposition method 106
W. Zhu, B. H. Tan and H. S. Tan (Singapore, Singapore)

Application of nickel plating for the synthesis of chemical vapour deposition of diamond on steels..... 111
H. C. Shih, W. T. Hsu, C. T. Hwang, C. P. Sung, L. K. Lin and C. K. Lee (Hsinchu, Taiwan)

Nucleation of diamond particles by hot filament chemical vapour deposition 115
K. Tamaki, Y. Watanabe, Y. Nakamura and S. Hirayama (Kanagawa, Japan)

Microwave diamond synthesis with high oxygen hydrocarbons—(carbon dioxide, oxygen) 120
C.-F. Chen, S.-H. Chen, T.-M. Hong (Hsinchu, Taiwan), H.-W. Ko and S. E. Sheu (Lungtan, Taiwan)

ADVANCES IN COATING AND THIN FILM CHARACTERIZATION

Microstructural characterization and imaging techniques

Calibration of an off-axis quartz crystal thickness monitor for a pulsed laser deposition system using a high resolution scanning electron microscope 125
S. D. Walck, J. S. Zabinski, M. S. Donley (Wright Patterson, OH, USA) and J. E. Bultman (Dayton, OH, USA)

XRD characterization of multilayered systems 130
P. Scardi, L. Lutterotti (Mesiano, Italy) and A. Tomasi (Povo, Italy)

Temperature dependence of atomic mixing at the copper–silicon interface..... 135
A. M. Ektessabi (Kyoto, Japan)

Low energy electron microscopy studies of Ge and Ag growth on Si(111)..... 140
A. W. Denier van der Gon, R. M. Tromp and M. C. Reuter (Yorktown Heights, NY, USA)

Surface and thin film analysis techniques

Thermal modeling of a calorimetric technique for measuring the emittance of surfaces and coatings..... 146
D. A. Jaworske (Cleveland, OH, USA)

Further investigation of proton elastic scattering cross-section on carbon and silicon 153
T. Xie (McMinnville, OR, USA), J. Liu (Chicago, IL, USA) and H. J. Fischbeck (Norman, OK, USA)

Energy calibration accomplished by proton resonance scattering simulation 159
T. Xie (McMinnville, OR, USA), J. Liu (Chicago, IL, USA) and H. J. Fischbeck (Norman, OK, USA)

Application of X-ray photoelectron spectroscopy valence bands in studying ceramic surfaces and interfaces 164
D. Majumdar and D. Chatterjee (Rochester, NY, USA)

Auger electron spectroscopy studies of interfacial reactions in metal/semiconductor multilayers activated during differential scanning calorimetry measurements..... 169
A. Zalar (Ljubljana, Slovenia), S. Hofmann, F. Pimentel (Stuttgart, Germany) and P. Panjan (Ljubljana, Slovenia)

New trends in analytical tribology 173
J. M. Martin and M. Belin (Ecully, France)

Optical properties and surface morphology studies of palladium contacts on mercuric iodide single crystals 180
M. A. George, M. Azoulay, A. Burger, Y. Biao, E. Silberman (Nashville, TN, USA) and D. Nason (Goleta, CA, USA)

Non-destructive characterization techniques

Decorative hard coatings: advances in optical characterization techniques 184
U. Beck, G. Reiners and K. Witt (Berlin, Germany)

Photothermal characterization of optical thin films..... 191
Z. L. Wu, P. K. Kuo, L. Wei, S. L. Gu and R. L. Thomas (Detroit, MI, USA)

In-situ characterization techniques

Kinetics of aluminium film oxidation measured by a modified quartz crystal microbalance 199
M. Martin and E. Fromm (Stuttgart, Germany)

Investigation of the adhesion mechanisms of silicon alloy thin films on polymer substrates by IR ellipsometry 204
B. Drévillon (Palaiseau, France), J. C. Rostaing (Les Loges en Josas, France) and S. Vallon (Palaiseau, France)

Mechanical properties and film adhesion

Elastic behaviour of TiN thin films 209
M. Elena, M. Bonelli (Povo, Italy), C. E. Bottani, G. Ghislotti (Milano, Italy), A. Miotello (Povo, Italy), P. Mutti and P. M. Ossi (Milano, Italy)

The nanoindentation response of systems with thin hard carbon coatings 214
S. V. Hainsworth, T. Bartlett and T. F. Page (Newcastle upon Tyne, UK)

The temperature-variant hardness response of duplex TBCs 219
P. C. Twigg and T. F. Page (Newcastle upon Tyne, UK)

Finite element studies of tensile testing on thin film multilayers 225
D. Krus, Jr, and R. W. Hoffman (Cleveland, OH, USA)

An overview on metal/PET adhesion 230
J. F. Silvain (Talence, France) and J. J. Ehrhardt (Villers-lès-Nancy, France)

Interface structure and adhesion of sputtered Ti layers on Si: the effect of heat treatment 236
I. Kondo, T. Yoneyama, K. Kondo, O. Takenaka (Kariya, Japan) and A. Kinbara (Tokyo, Japan)

Cusp-like flaws along a rough surface 240
J. Li, C.-H. Chiu, H. Gao (Stanford, CA, USA) and T.-W. Wu (San Jose, CA, USA)

Measurement of Young's moduli of TiC-coated film by the X-ray method 247
H. Asada (Nagoya, Japan), Y. Kishi and Y. Hirose (Kanazawa, Japan)

Measurement of the adhesion of TiN and Al coatings by fracture mechanics tests 253
D. Müller, Y. R. Cho and E. Fromm (Stuttgart, Germany)

TOPICAL CONFERENCE ON ADVANCED METALLIZATION

Advanced metallization: materials and processes

Advanced multilayer metallization schemes with copper as interconnection metal 257
S. P. Murarka, R. J. Gutmann (Troy, NY, USA), A. E. Kaloyeros and W. A. Lanford (Albany, NY, USA)

Properties of titanium and aluminum thin films deposited by collimated sputtering 267
D. Liu, S. K. Dew, M. J. Brett (Edmonton, Alb., Canada), T. Janacek, T. Smy (Ottawa, Ont., Canada) and W. Tsai (Palo Alto, CA, USA)

Selective plasma deposition 274
M. A. Ray, J. Duarte and G. E. McGuire (Research Triangle Park, NC, USA)

Advanced dielectrics and planarization: materials and processes

Stability and surface morphology of films obtained by a chemical vapor deposition process 281
H. J. Viljoen (Lincoln, NE, USA)

Characterization of phosphosilicate glass films obtained using plasma-enhanced chemical vapor deposition from tetraethylorthosilicate and trimethylphosphite 287
C. L. Pillote, F. A. Shemansky (Mesa, AZ, USA), T. S. Cale and G. B. Raupp (Tempe, AZ, USA)

Diffusion barriers

Kinetics and conformality of TiN films from TDEAT and ammonia 294
T. S. Cale, M. B. Chaara, G. B. Raupp (Tempe, AZ, USA) and I. J. Raaijmakers (San Jose, CA, USA)

Amorphous $W_{40}Re_{40}B_{20}$ diffusion barriers for ⟨Si⟩/Al and ⟨Si⟩/Cu metallizations 301
E. Kolawa, X. Sun, J. S. Reid, J. S. Chen, M.-A. Nicolet and R. Ruiz (Pasadena, CA, USA)

Study of sputtered molybdenum nitride as a diffusion barrier 306
V. P. Anitha, A. Bhattacharya, N. G. Patil and S. Major (Bombay, India)

Properties of chemical-vapor-deposited titanium nitride 311
J. B. Price, J. O. Borland and S. Selbrede (Sunnyvale, CA, USA)

Evaluation of amorphous (Mo, Ta, W)–Si–N diffusion barriers for ⟨Si⟩|Cu metallizations 319
J. S. Reid, E. Kolawa, R. P. Ruiz and M.-A. Nicolet (Pasadena, CA, USA)

Manufacturing aspects of low pressure chemical-vapor-deposited TiN barrier layers 325
E. O. Travis and R. W. Fiordalice (Austin, TX, USA)

Characterization of low pressure chemically vapor-deposited tungsten nitride films 330
S. D. Marcus and R. F. Foster (Phoenix, AZ, USA)

Spatial composition variation in sputtered Ti–W films 334
B. R. Rogers (Mesa, AZ, USA) and T. S. Cale (Tempe, AZ, USA)

Topical conference on advanced metallization (Poster session)

Mass and surface conductivity gain on polymer surfaces metallized using vacuum arc deposition 341
R. L. Boxman and S. Goldsmith (Tel Aviv, Israel)

Properties of reactively sputter-deposited Ta–N thin films 347
X. Sun, E. Kolawa, J.-S. Chen, J. S. Reid and M.-A. Nicolet (Pasadena, CA, USA)

Three-dimensional simulation of an isolation trench refill process 352
H. Liao and T. S. Cale (Tempe, AZ, USA)
